SKILLS

Here is a clear and complete list of my skills:

- support projects using **PHP 7.1 and newer versions; stay updated with the latest releases;**
- primarily work on projects using **Laravel (ready to switch to Symfony)**, ensuring a high level of knowledge and expertise;
- Symfony, CodeIgniter, and Yii (basic level knowledge to support legacy code);
- MySQL, MariaDB, PostgreSQL, Redis, and MongoDB Atlas (**database design and queue handling**);
- proficient in key client-side technologies, including HTML, CSS (SCSS), and JavaScript (ES6 features);
- practice with **Vue.js**, primarily version 3, while exploring both the Options and Composition API;
- support React project by developing basic features using theme components;
- AWS services such as EC2, RDS, and S3; DigitalOcean; and **Docker** containerization;
- web application security: basic prevention of XSS and CSRF, as well as the proper configuration of secure web servers;
- an intuitive and effective Git flow;
- responsible task management and a transparent workflow;
- additional knowledge and practice with Shopify (Liquid template language) as an e-commerce platform (theme customization, building custom apps, etc.).

EDUCATION
